WORK EXPERIENCE

Emerging Africa Group (Finance Investment)

Lagos, NG

Flutter Mobile Engineer

March 2022 - Present

- Implemented real-time messaging and notification features using Firebase, enabling users to stay connected and engaged with the app.
- I work with the UI/UX designer to bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the mobile application looks as well as how it works.
- I translated the needs of the company and the customers into functional and appealing interactive mobile applications.
- Developed and maintained a suite of CLI tools to automate repetitive tasks, freeing up valuable engineering time and improving the overall efficiency of the mobile development process.
- Contributed to the development of a secure authentication system, utilizing encryption and secure data storage to protect sensitive user information.

Springital (Food E-Commerce)

New Karu, Abuja NG

Flutter Mobile Developer

May 2021 – October 2022

- Supervised the creation of a cross-platform mobile application for iOS and Android, utilizing cutting-edge design principles and technology to provide a seamless user experience.
- I improved UI/UX for mobile apps resulting in a 45% increase in user satisfaction and engagement, as measured by app store ratings and in-app feedback surveys.
- Implemented and maintained a robust REST API, allowing the mobile app to communicate effectively with the backend system.
- I used Gitlab to implement continuous integration and delivery (CI/CD) pipelines leading to quicker and more reliable app releases, as well as a 50% reduction in manual errors.
- Developed and maintained a suite of CLI tools to automate repetitive tasks, freeing up valuable engineering time and improving the overall efficiency of the mobile development process.

Neotisa (EduTech)

Yaba, Lagos NG

Flutter Mobile Developer

December 2021 – October 2022

- Led the development of a cross-platform mobile application for Android and iOS, leveraging the latest technologies and design patterns to deliver a seamless user experience.
- I improved UI/UX for mobile apps resulting in a 45% increase in user satisfaction and engagement, as measured by app store ratings and in-app feedback surveys.
- Develop and integrate educational content and features into the mobile application
- Gitlab was used to implement continuous integration and delivery (CI/CD) pipelines, which led to quicker and more reliable app releases and a 50% decrease in manual errors.
- Developed and maintained a suite of CLI tools to automate repetitive tasks, freeing up valuable engineering time and improving the overall efficiency of the mobile development process.

Huzz Africa (Finance Management)

Lagos, Nigeria

Flutter Mobile Engineer

September 2022 – February 2023

- Developed and implemented a new UI/UX design for a mobile app, increasing user engagement by 30% and resulting in a 50% decrease in support tickets related to user experience.
- To deliver high-performance, user-friendly experiences, I oversaw the development of numerous mobile applications for iOS and Android using a combination of native and cross-platform technologies.
- Built and maintained a secure and scalable REST API, enabling seamless integration with multiple third-party systems and improving data transfer speed by 40%.
- Streamlined the development process by utilizing Gitlab for version control and the CLI for automation of repetitive tasks, resulting in a 30% increase in productivity and efficiency.
- Collaborated with the design team to improve the overall UI/UX of the mobile app, resulting in a 10% increase in conversion rates and a 40% decrease in user drop-off rates.

Blunic-LLC (Food E-Commerce)**England, UK***Flutter Mobile Engineer**August 2022 – February 2023*

- Contributed to the development of a cross-platform mobile app for Android and iOS, utilizing modern design patterns and best practices to deliver a seamless user experience.
- Contributed to the development of a secure authentication system, utilizing encryption and secure data storage to protect sensitive user information.
- Contributed to the integration of the mobile app with Cripschat, providing users with an enhanced customer support communication experience.
- Optimized app performance and reduced app size by 40% through the use of cutting-edge technologies and best practices.
- Utilized Firebase for app analytics, allowing for real-time monitoring and optimising user engagement and app performance.

Agora Care (Mental Health Community)**England, UK***Flutter Mobile Engineer**August 2022 – January 2023*

- Implemented real-time messaging and notification features using Firebase, enabling users to stay connected and engaged with the app.
- improved performance and dependability by implementing and maintaining a strong Firebase Auth and Backend that allowed seamless communication between the mobile app and backend systems.

Packray (Logistics)**England, UK***Flutter Mobile Engineer**August 2022 – January 2023*

- Implemented real-time messaging and notification features using Firebase, enabling users to stay connected and engaged with the app.
- Implemented and maintained a robust REST API, enabling seamless communication between the mobile app and backend systems, resulting in improved performance and reliability.
- Utilized Firebase for app analytics, allowing for real-time monitoring and optimising user engagement and app performance.
- Utilized Gitlab for version control and CI/CD pipelines, resulting in faster and more reliable app releases and reducing manual errors by 50%.

Search Kee (Gadget E-Commerce)**Texas, Huston***Flutter Mobile Engineer**August 2022 – January 2023*

- implemented Firebase Chat for real-time messaging and notification features, enabling users to stay connected and engaged with the app.

Artefacts Head AI**Lagos Nigeria***Flutter Mobile AI Engineer**November 2022 – January 2023*

- Design, develop, and test mobile applications using Flutter, Tensorflow, and other AI technologies
- Collaborated with data scientists and designers to create engaging and user-friendly AI-powered applications
- Develop and integrate trained models into the mobile application to provide intelligent and personalized user experiences.
- Ensure that the mobile application is optimized for performance and efficiency.
- Continuously improve the application by incorporating feedback from users and stakeholders.
- Stay up-to-date with the latest mobile development trends, AI technologies, and industry best practices.

LEADERSHIP EXPERIENCE

Parliamentary**OAU, Ile-Ife,***Deputy Speaker**January 2019 – January 2021*

- Assist the Student Speaker in preparing and delivering speeches and presentations at events and meetings.
- Engage with the student body and represent their interests and concerns to the appropriate channels.
- Collaborate with other student leaders and organizations to plan and execute events and initiatives.
- Serve as a liaison between the student body and university administration, faculty, and staff.
- Attend meetings and events on behalf of the Student Speaker when necessary.
- Maintain strong relationships with various stakeholders, including students, staff, faculty, and community members.
- Assist with other tasks as needed to support the Student Speaker and the overall success of the student body.

Parliamentary
Speaker

OAU, Ile-Ife,
August 2023 – Present

- Represent the student body at various events and meetings, including speaking on behalf of students
- Collaborate with other student leaders and organizations to plan and execute events and initiatives
- Communicate with students and staff to understand and represent the interests and concerns of the student body
- Serve as a liaison between the student body and university administration, faculty, and staff
- Attend meetings and events with university leadership and other stakeholders to advocate for the student body
- Develop and deliver speeches and presentations that represent the student's voice and perspective
- Maintain strong relationships with various stakeholders, including students, staff, faculty, and community members
- Lead and manage a team of student leaders and volunteers to ensure the success of events and initiatives

Elejant Tech

CTO of StantPay Development

Ile-Ife Osun, NG
October 2022 – Present

- Lead the technology team and provide strategic direction for the company's technology initiatives
- Oversee the development and implementation of the company's technical roadmap and ensure alignment with the overall business strategy
- Manage the company's technology infrastructure, including hardware, software, and networking systems
- Ensure the security and privacy of the company's data and technical systems
- Identify emerging technologies and opportunities for the company to innovate and improve its technical capabilities
- Work closely with other departments, such as product development, sales, and marketing, to understand their technology needs and develop solutions that align with their goals
- Recruit and manage a high-performing team of engineers, developers, and other technical professionals
- Build and maintain strong relationships with external technology partners and vendors

SKILLS & INTERESTS

SKILLS: Flutter (Dart) | GetX, BLoC, Provider and Stackl | RestFul APIs | Firebase | Socket.io | Product Design | AppStore and PlayStore Deployment | CodeMagik | HTML/CSS | Python & Data Science and Analysis Knowledge

- Proficiency in mobile development using Flutter, with experience in building production-level applications
- Expertise in continuous integration and deployment (CI/CD) methodologies and tools, such as Jenkins, CircleCI, or Bitrise
- Experience with Firebase services, including Cloud Firestore, Cloud Functions, and Cloud Messaging, for building scalable and real-time mobile applications
- Proficiency in state management using GetX or BLoC, with a deep understanding of reactive programming concepts
- Experience with real-time communication protocols, such as Socket.io, and integrating them into mobile applications
- Knowledge of modern mobile application architecture patterns, including Clean Architecture and Model-View-ViewModel (MVVM)
- Strong proficiency in programming languages such as Dart, JavaScript, or Python
- Experience in product design and working closely with designers to create visually appealing and user-friendly applications
- Strong problem-solving and analytical skills, with the ability to debug and troubleshoot complex issues in mobile applications
- Ability to work in a team environment and collaborate effectively with cross-functional teams, including designers, product managers, and other engineers
- Familiarity with agile development methodologies, such as Scrum or Agile
- Experience with version control tools such as Git and GitHub

INTERESTS: product design, research, innovation, basketball, and exploring new programming languages and tools to expand my technical knowledge and improve my problem-solving skills; open-source software development and contributing to community-driven projects; and participating in hackathons and other coding competitions to challenge and improve my skills, finally playing mobile games and exploring new applications to gain insights into user experience and design trends
